# Visualizing Human Geography

At Home in a Diverse World

3rd Edition ©2018

Alyson Greiner

Ideal for a one-semester elective course, *Visualizing Human Geography: At Home in a Diverse World* is a comprehensive, modern book for today's human geography course. With current examples, thorough coverage of geographers' tools and technology, and a visual design that is accessible without sacrificing content, it is a resource that will appeal to a broad range of teachers and students.

The program maximizes the use of photographs, maps and illustrations to bring the colorful diversity of human cultures, political systems, food production, and migration into the classroom. This text provides readers with a thrilling approach to the subject, allowing them to see human geography as a dynamic and growing science and helping them move beyond the idea that geography is about memorization.

Unique presentation of visuals facilitates reflection on the textual content, providing a clear path to the understanding of key concepts. In this edition, *Visualizing Human Geography* includes improved coverage of migration and industry and new animations to support each chapter.
